Decision Log (summary)

Attribute	Value
Document ID	KB-H-006
Audience	Every role, AI agents, LLM retrieval
Purpose	The decisions and where they are kept
Scope	—
Prerequisites	—
Owner	Documentation Owner (proposed)
Approver	Product Owner (to be confirmed)
Version	1.0
Status	Draft for review
Last updated	8 November 2026
Last validated	8 November 2026
Source files	—

Related AEM paths	—

The decision log is kept in the code repository (https://github.com/sradha-tcs/tcs-corp/blob/main/docs/handover/knowledge-base/decision-log.md); its generated copy: Architecture decisions.

1. Recent decisions

ID	Subject	Status
KB-D-064	Separate AEM Assets environment	Not adopted
KB-D-065	Language master root language-masters	Approved
KB-D-066	Project documents on migrated-page-content-edam	Approved
KB-D-067	Dynamic Media for all assets (new root)	Approved
KB-D-068	Three review roots and their purposes	Approved

2. Screenshots

No screenshot belongs to this document (it describes code, configuration or process). Evidence screenshots are listed in the screenshot register.

3. Known limitations

- None recorded for this document.

4. Open items

- None.

5. Change history

Version	Date	Author	Change
1.0	8 November 2026	Delivery team (documentation program)	First version of the role-specific documentation (master documentation prompt), generated from the repository and the published reference pages

FAQ

Attribute	Value
Document ID	KB-H-003
Audience	Every role, AI agents, LLM retrieval
Purpose	Frequent questions
Scope	—
Prerequisites	—
Owner	Documentation Owner (proposed)
Approver	Product Owner (to be confirmed)
Version	1.0
Status	Draft for review
Last updated	8 November 2026
Last validated	8 November 2026

Question	Answer
Why does my page under /language-masters/en show no header?	Its root needs references/nav and references/footer (copied into the root) and the page must be published; the code reads the root's own references.
Why does a list say "There are no items to show"?	The list reads the query index of the page's own root; the linked or tagged pages must be published and indexed in that root.
Where are the redirects applied?	Not by the platform for per-locale sheets: a CDN rule is needed (on hold).
Can I edit a PDF of this documentation?	No: edit the Markdown and regenerate.
Where do I record a decision?	docs/handover/knowledge-base/decision-log.md in the code repository (KB-D-xxx).
Which test status can I use without running a test?	Not Run, Blocked, Not Applicable or Requires Manual Validation.
Why are image fields not picking from Dynamic Media?	The asset picker PR #200 waits for the Extension Manager set-up.

1. Screenshots

No screenshot belongs to this document (it describes code, configuration or process). Evidence screenshots are listed in the screenshot register.

2. Known limitations

- None recorded for this document.

3. Open items

- None.
