1. Exercises

1. **Find a block**: open https://main--tcs-corp--sradha-tcs.aem.live/design-block-master/en/block-library/teaser and identify three variations; look them up in the Teaser variations.
2. **Inspect markup**: run `curl https://main--tcs-corp--sradha-tcs.aem.live/design-block-master/en/block-library/hero.plain.html` and match the rows with the Hero fields.
3. **Data layer**: open a curated page, run `window.adobeDataLayer` in the console and find the page entry.
4. **Root behaviour**: open a page of each root and check in the network panel which placeholders.json it loads.
5. **Local run** (developers): `aem up`, change a token in styles/styles.css, see it on localhost:3000, revert.
6. **Authoring** (authors, needs access): build a test page in /content/tcs-corp/language-master/en with a Hero and a Teaser, preview, publish, unpublish.
