Potential improvements 31

Summary

The Home page of the Figma design *New Screens from New DS* (frame **home-desktop**, node 229-15426) is implemented on the structure of the template page `/content/tcs-corp/us/en/temp-design-pages/home`, with every section authored, 40 supporting pages under `/content/tcs-corp/us/en/dummy-pages`, 45 DAM assets and 48 tags of the `tcs-corp` namespace. All five retrieval types (manual, fixed list, parent page, tags, query index) are configured and were validated on a local preview that serves the pages at their published paths, with the query index, taxonomy and Authors sheet as they will be published.

Delivery as a content package. The AEM author instance (`author-p220207-e2271469`) returned *401 Unauthorized* to this session for Sites, Assets and Tags, so nothing was created directly in AEM. Everything is delivered as an AEM content package that creates the pages, assets and tags on installation; the pages are then authorable and editable in Universal Editor like any other page. The template page was read through a preview of it (`/en/temp-design-pages/home` on aem.page, preview only, not published).

Deliverable	File	What it is
Content package	`tcs-corp-home-content-1.0.1.zip`	FileVault package: the Home page, 40 dummy pages, 45 DAM assets (original renditions and metadata), 48 tags (merged)
Metadata sheet	`metadata.csv`	41 rows in the 33 columns of `/content/tcs-corp/us/en/metadata`: page type, meta title / description / keywords, author, dates, reading time, Open Graph and Twitter, robots (noindex for the sample pages), region, language, persona, campaign, content type, featured and priority
Authors sheet	`authors.csv`	Priya Sethi (author of the Insight & Opinion feature card), for `/content/tcs-corp/us/en/data/authors`
Code changes	repository working tree (not committed)	Tag retrieval from AEM page tags (F-07), Hero icon fix, unit test
This report	`HOME-IMPLEMENTATION-REPORT.pdf`	Sections A–G of the brief, installation and go-live steps

Installation and Go-Live

1. **Deploy the code changes** (pull request to `main`): `helix-query.yaml`, `utils/query-index.js`, `utils/metadata.js`, `blocks/hero/hero.js`, `test/list/query-index-tags.test.mjs`. Apply the index configuration to the site configuration and re-index (the new `cqTags` column carries the AEM page Tags).
2. **Install the package**: AEM author › Tools › Deployment › Packages › Upload `tcs-corp-home-content-1.0.1.zip` › Install. Filters: the Home page, each dummy page group and the two DAM folders are *replace* (new content); `/content/cq:tags/tcs-corp` is *merge*: existing tags are kept, only new tags are added.
3. **Reprocess the assets**: Assets › `/content/dam/tcs-corp/home` and `/content/dam/tcs-corp/dummy-pages` › select all › Reprocess Assets (assets installed by a package have only their original rendition).
4. **Publish the taxonomy** page of the locale (`/content/tcs-corp/us/en/taxonomy`) so `/en/taxonomy.json` lists the new tag titles (pills and tag labels).
5. **Add the sheet rows**: paste `metadata.csv` into the bulk metadata sheet and `authors.csv` into the Authors sheet; publish both. Bulk metadata applies only once `metadata.source` lists the locale sheets (finding F-11).
6. **Publish the pages**: Sites › select `dummy-pages` (with children) and `home` › Quick Publish (or Manage Publication with references). Lists and the Filter List read the query index, which is updated as the pages are published.
7. **Verify** on `https://main--tcs-corp--sradha-tcs.aem.page/en/home` and `.aem.live`: the checks of section G.

Section A – Page Created

Attribute	Value
Page name	home
Page title / Navigation title	Home / Home
Page path	/content/tcs-corp/us/en/home
Published path	/en/home
Template used	Structure and block hierarchy of /content/tcs-corp/us/en/temp-design-pages/home (7 sections: Hero; List + List; Conversation Canvas; Table List; List; List + List; Teaser), page template /libs/core/franklin/templates/page
Page Type	home (Site Global Template Home: the first section meets the header)
Header / Footer	Inherited: the locale's references/nav and references/footer (the footer holds "Let's build the future together")

Page metadata (Phase 11). Page properties are stored on the page; the other columns are rows of the bulk metadata sheet (this project keeps them out of the page dialog).

Field	Value	Where
Page Title	Home	Page properties (jcr:title)
Navigation Title	Home	Page properties (navTitle)
Description / SEO description	TCS helps enterprises turn AI ambition into competitive advantage, with transformation services across industries, cloud, data and cybersecurity.	Page properties (jcr:description); meta-description row
Keywords	tcs, tata consultancy services, ai transformation, agentic ai, cloud modernisation, digital transformation, industries	Page properties (keywords)
Page Type	home	Page properties (page-type)
Tags (industries, services, technologies, content type)	AI, Cloud, Cybersecurity, Consulting, Agentic AI, Insights	Page properties (cq:tags, published as cq-tags)
Open Graph title / description	We help brands turn AI ambition into competitive advantage / Transformation themes, insight and opinion, industry expertise and careers at Tata Consultancy Services.	Metadata sheet og-title, og-description
Open Graph / SEO image	/content/dam/tcs-corp/home/home-og.jpg	Page image node and metadata sheet og-image
Canonical URL	https://www.tcs.com/en/home	Metadata sheet canonical-url [To be confirmed: production domain — owner: Site Administrator]
Meta title	TCS | We help brands turn AI ambition into competitive advantage	Metadata sheet meta-title

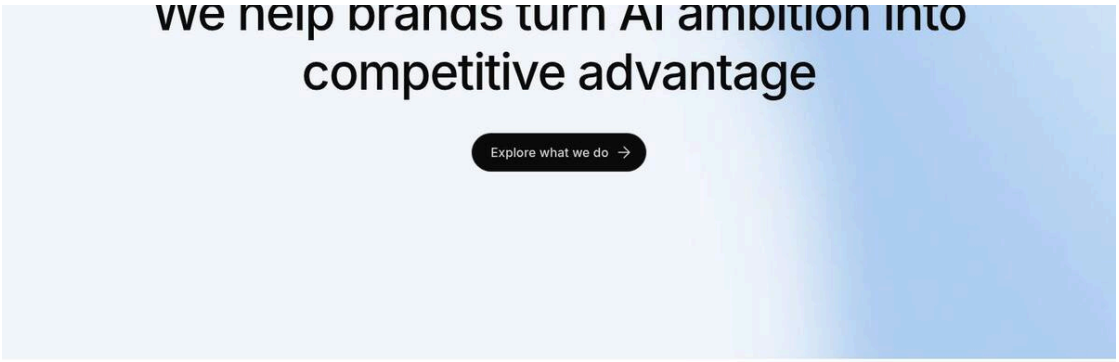

Figure 1: Home page at 1440 px on the local preview — Hero, Transformation themes, Insight & Opinion

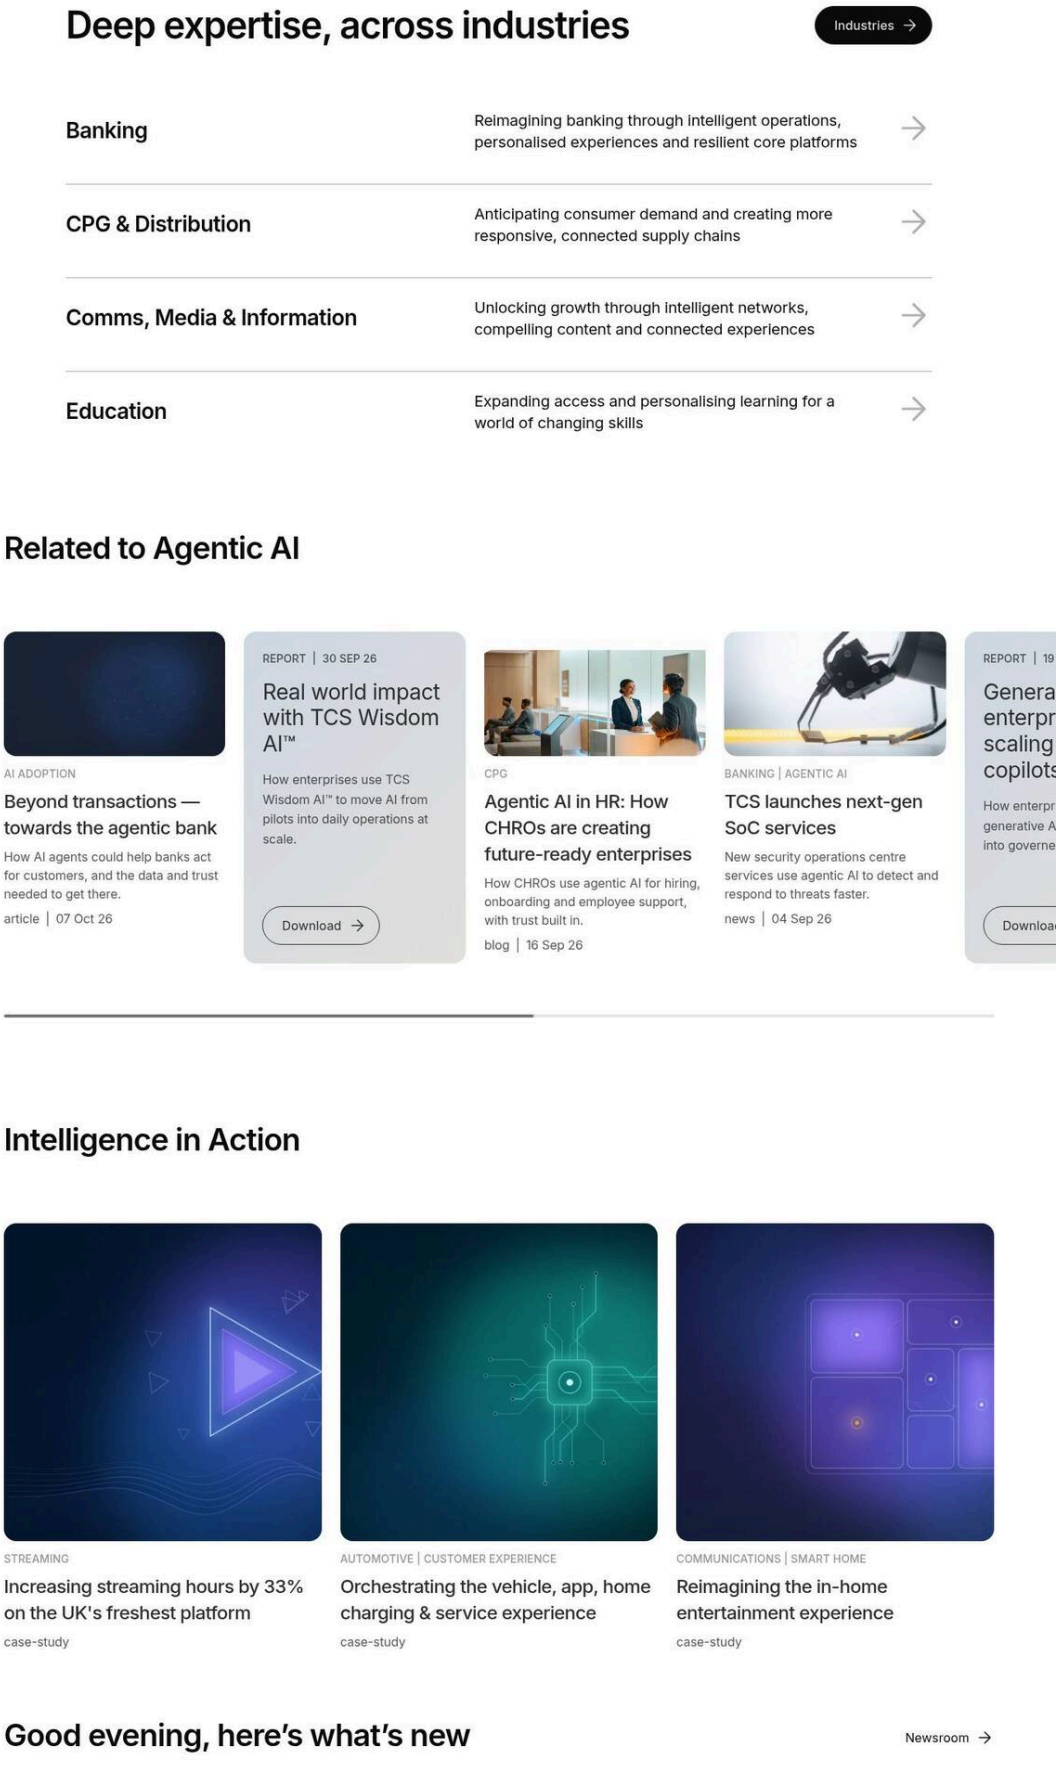

Figure 2: Home page at 1440 px — Let's make it happen, Industries, Related to Agentic AI, Intelligence in Action

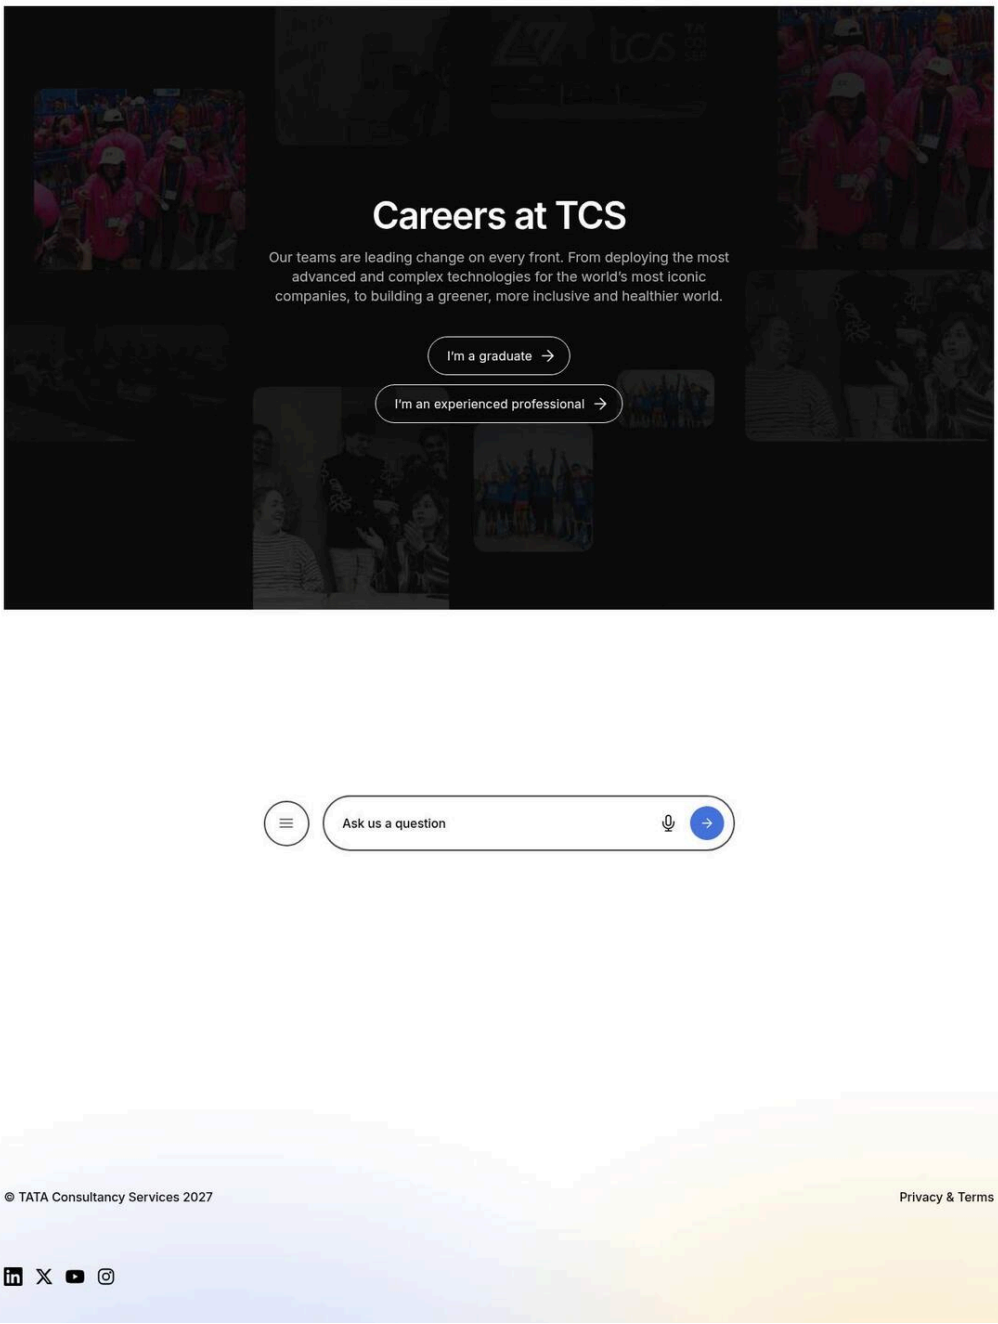

Figure 3: Home page at 1440 px — News, Careers at TCS, footer

Section B – Components Authored

Figma section → template component → selected variation → authoring configuration. Fields not listed keep their defaults.

B.1 Hero → Hero

Attribute	Value
Section	1 (full-width)
Component	Hero
Variation selected	Image type Default, Hero View Default, BG Color "Light, no overlay", middle / centre / centre, icon + eyebrow + H1 + primary CTA
Authoring details	content_icon = /content/dam/tcs-corp/home/icons/tcs-icon-infrastructure.svg; content_iconAlt = ; content_eyebrow = Infrastructure to Intelligence; content_title = We help brands turn AI ambition into competitive advantage; content_titleType = h1; image = /content/dam/tcs-corp/home/home-hero-background.jpg; imageAlt = ; ctas = 1 items; classes_background = bg-light; classes_alignment = align-middle; classes_horizontal = align-center; classes_textAlignment = text-center

B.2 Transformation themes → List

Attribute	Value
Section	2 (fixed-width)
Component	List
Variation selected	fixed source; panel cards; desktop grid
Authoring details	title = Transformation themes shaping the future; titleType = h2; source = fixed; cardStyle = panel; panelHeight = portrait; showDate = false; showTags = false; desktopColumns = 4; tabletMode = horizontal-scroll; tabletVisible = 2.3; mobileMode = horizontal-scroll; mobileVisible = 1.2

#	link	headline	summary	eyebrow	ctaLabel	kind	theme	image	imageAlt
1	…/dummy-pages/insights/beyond-transactions-towards-the-agentic-bank	Beyond transactions – towards the agentic bank	Discover how AI transforms banking operations, customer relationships and everyday interactions	AI adoption	Explore	panel	dark	—	—
2	…/dummy-pages/in-	The foundation for what	Modern cloud platforms	Cloud modernisation	Explore	panel	image	/content/dam/tcs-corp/	—

#	link	headline	summary	eyebrow	ctaLabel	kind	theme	image	imageAlt
	sights/cloud-modernization-strategy	comes next	ready for AI at scale					home/themes/theme-cloud-foundation.jpg	
3	.../dummy-pages/insights/reimagining-how-your-business-works	Reimagining how your business works	Connect people, processes and technology to create a more adaptive business	Digital transformation	Explore	panel	brand	—	—
4	.../dummy-pages/insights/confidence-in-a-connected-world	Confidence in a connected world	Security built into every layer	Cyber resilience	Explore	panel	image	/content/dam/tcs-corp/home/themes/theme-cyber-resilience.jpg	—

B.3 Insight & Opinion → List

Attribute	Value
Section	2 (fixed-width)
Component	List
Variation selected	fixed source; mixed cards, feature card first; desktop grid
Authoring details	title = Insight & Opinion; titleType = h2; link = /en/dummy-pages/explore-insights; linkText = Explore insights; source = fixed; cardStyle = mixed; featureFirst = true; showDate = true; dateFormat = dd-mmm-yy; showTags = false; classes_paddingtop = pt-2000; desktopColumns = 4; tabletMode = horizontal-scroll; tabletVisible = 2.3; mobileMode = horizontal-scroll; mobileVisible = 1.2

#	link	eyebrow	ctaLabel	kind	theme
1	.../dummy-pages/insights/enabling-banking-innovation-resilience-core-modernisation	—	—	—	—
2	.../dummy-pages/insights/agentic-ai-in-hr-chros-future-ready-enterprises	CPG	—	—	—
3	.../dummy-pages/insights/real-world-impact-tcs-wisdom-ai	—	Download	report	grey

#	link	eyebrow	ctaLabel	kind	theme
4	.../dummy-pages/case-studies/increasing-streaming-hours-uk-platform	Streaming	—	—	—
5	.../dummy-pages/case-studies/reimagining-in-home-entertainment-experience	Communications | Smart home	—	—	—

B.4 Intelligent Personalisation Block ("Let's make it happen") → Conversation Canvas

Attribute	Value
Section	3 (default width)
Component	Conversation Canvas
Variation selected	Default style, title size Bigger, search bar, 5 button pills
Authoring details	bgStyle = default; title = Let's make it happen; titleSize = bigger; text = Describe or select a challenge, opportunity or ambition; menuRootPath = /en; menuDepth = 1; searchPlaceholder = Ask us a question; searchButtonStyle = primary; searchButtonLabel = Submit

#	link	linkText	buttonView	linkType
1	.../dummy-pages/what-we-do	Solve a business challenge	button	secondary
2	.../dummy-pages/what-we-do	Explore capabilities	button	secondary
3	.../dummy-pages/about-tcs	Learn about TCS	button	secondary
4	.../dummy-pages/investors	Invest in TCS	button	secondary
5	.../dummy-pages/careers	Join TCS	button	secondary

B.5 Industries → Table List

Attribute	Value
Section	4 (fixed-width)
Component	Table List
Variation selected	Variation Industries, item action Arrow, numbers hidden, view-all button Primary

Attribute	Value
Authoring details	variations = industries; listHeading = Deep expertise, across industries; listHeadingType = h2; maxCards = 4; viewAllLabel = Industries; viewAllLink = /en/dummy-pages/industries; ctaStyle = primary; numbers = hide; itemAction = arrow; itemButtonLabel = Explore; motion = none

#	title	description	link	linkText
1	Banking	Reimagining banking through intelligent operations, personalised experiences and resilient core platforms	…/dummy-pages/industries/banking	Banking
2	CPG & Distribution	Anticipating consumer demand and creating more responsive, connected supply chains	…/dummy-pages/industries/cpg-distribution	CPG & Distribution
3	Comms, Media & Information	Unlocking growth through intelligent networks, compelling content and connected experiences	…/dummy-pages/industries/communications-media-information	Comms, Media & Information
4	Education	Expanding access and personalising learning for a world of changing skills	…/dummy-pages/industries/education	Education

B.6 Collection – Agentic AI → List

Attribute	Value
Section	5 (default width)
Component	List
Variation selected	tags source; mixed cards; desktop horizontal-scroll
Authoring details	title = Related to Agentic AI; titleType = h2; source = tags; tags = Agentic AI; tagsUseCurrentPage = false; tagMatch = any; rootPath = /en/dummy-pages; orderBy = lastModified; sortOrder = descending; maxItems = 8; cardStyle = mixed; showTags = false; showDate = true; desktopMode = horizontal-scroll; desktopVisible = 4.2; tabletMode = horizontal-scroll; tabletVisible = 2.3; mobileMode = horizontal-scroll; mobileVisible = 1.2

B.7 Intelligence in Action → List

Attribute	Value
Section	6 (default width)
Component	List
Variation selected	parent source; image cards; desktop grid

Attribute	Value
Authoring details	title = Intelligence in Action; titleType = h2; source = parent; parentPath = /en/dummy-pages/case-studies; parentUseCurrentPage = false; directChildrenOnly = true; orderBy = title; sortOrder = ascending; maxItems = 3; cardStyle = image; imageRatio = 1-1; showDescription = false; showDate = false; showCta = false; showTags = false; desktopColumns = 3; tabletColumns = 3; mobileMode = horizontal-scroll; mobileVisible = 1.2

B.8 News → List

Attribute	Value
Section	6 (default width)
Component	List
Variation selected	parent source; image cards, rows of links (Figma variation 5); desktop grid
Authoring details	title = Good evening, here's what's new; titleType = h2; link = /en/dummy-pages/newsroom; linkText = Newsroom; linkType = primary; source = parent; parentPath = /en/dummy-pages/newsroom; parentUseCurrentPage = false; directChildrenOnly = true; orderBy = title; sortOrder = ascending; maxItems = 3; displayAsTeaser = false; showDate = false; showDescription = false; classes_paddingtop = pt-2000

B.9 Careers → Teaser

Attribute	Value
Section	7 (default width)
Component	Teaser
Variation selected	Style Background image, BG Color Dark, centred, title size L, two Secondary CTAs
Authoring details	title = Careers at TCS; titleType = h2; showEyebrow = false; description = Our teams are leading change on every front. From deploying the most advanced and complex technologies for the world's most iconic companies, to building a greener, more inclusive and healthier world.; image = /content/dam/tcs-corp/home/careers/careers-collage.jpg; imageAlt = ; classes = background; bgColor = dark; textAlignment = text-center; verticalAlignment = valign-middle; titleSize = title-l; primaryCtaText = I'm a graduate; primaryCta = /en/dummy-pages/careers/graduates; primaryCtaStyle = secondary; secondaryCtaText = I'm an experienced professional; secondaryCta = /en/dummy-pages/careers/experienced-professionals; secondaryCtaStyle = secondary

Section C – Assets Created

45 assets in two DAM folders. Figma crops are the design's own imagery (text-free regions of the frames; the Careers collage from its background frame); the others were generated for this implementation (abstract compositions in the design's palette, no text, people or brand marks). Every asset has `dc:title`, `dc:description` (also the alt text) and `cq:tags`.

Asset name	Asset path	Source	Usage location	Tags

Section D – Tags Created

Namespace `tcs-corp` (`/content/cq:tags/tcs-corp`), merged with the existing tags. The existing IDs `tcs-corp:industry/…` and `tcs-corp:content-type/…` (singular, as published in `/en/taxonomy.json`) are kept; Services, Technologies and Topics are added the same way. Topics support the Home page collections (Agentic AI) that cross industries and services.

Tag name	Tag ID	Tag path	Usage (pages)
Industries	tcs-corp:industry	/content/cq:tags/tcs-corp/industry	category

Section E – Dummy Content Pages

40 pages (the ten example topics of the brief, the pages of the Figma cards, news, industries and the hub pages the CTAs lead to). Each has Title, Navigation Title, Description, Keywords and Tags as page properties; a Hero with image, eyebrow, title, description and CTA; body text; a Related List (tag-based) or, for hubs, a List of child pages; and the metadata sheet row with eyebrow, content type, dates, thumbnail and Open Graph values.

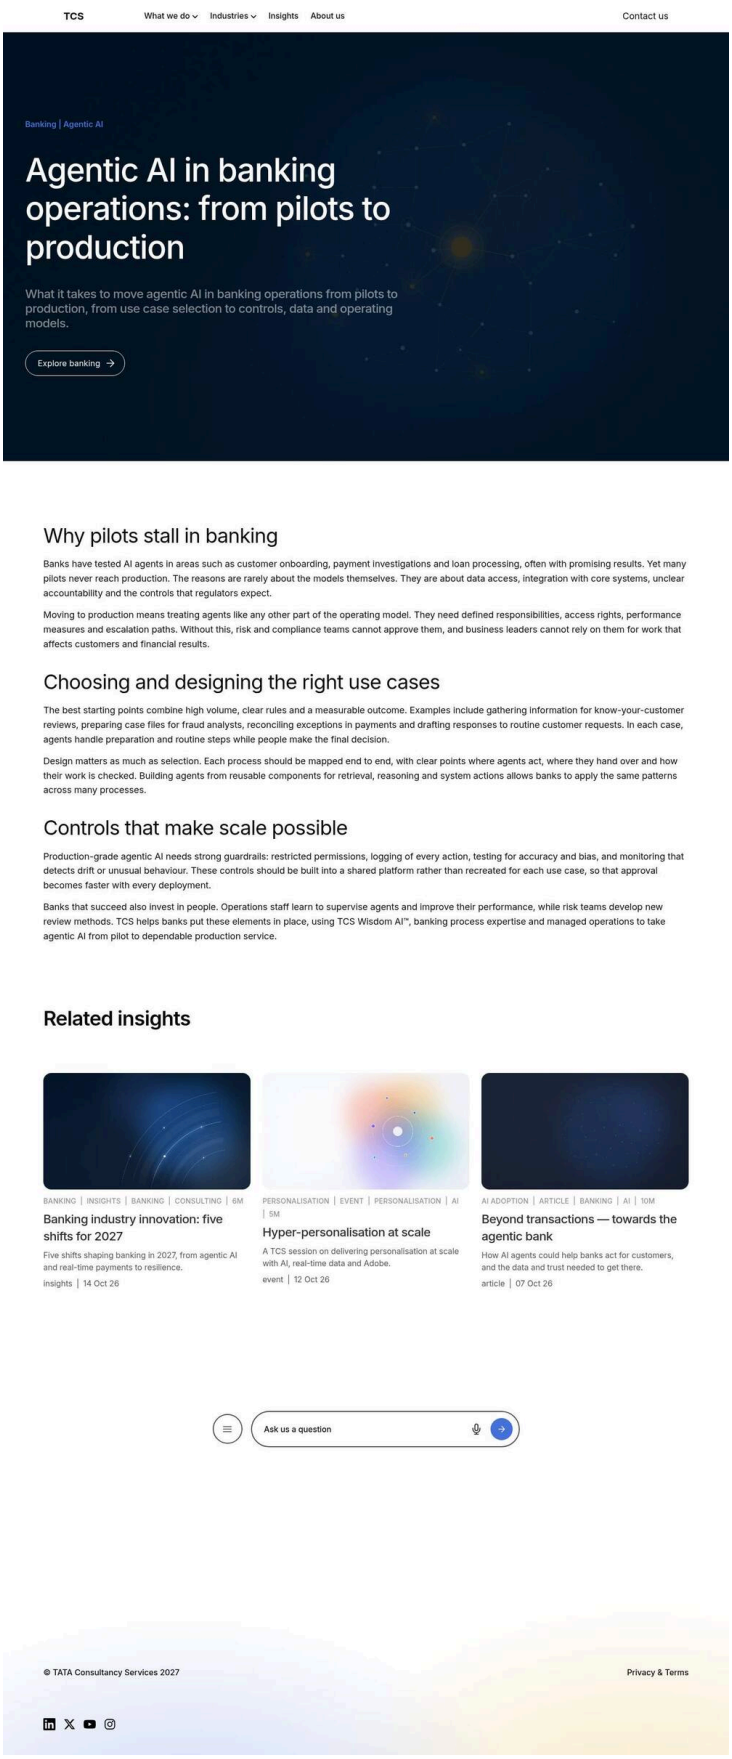

Figure 4: A dummy article page (Agentic AI in banking operations) with its Hero, body and tag-based Related insights

Section F – Dynamic Retrieval Configuration

Component	Retrieval type	Source content	Tags / criteria	Validated result
Home: Transformation themes (List)	A. Manual authoring	4 List Items with headline, summary, eyebrow, image, theme, CTA	none	4 panel cards (dark, image, brand, image)
Home: Insight & Opinion (List)	B. Fixed list	5 List Items linking dummy pages; title, description, image, date from the query index; overrides: eyebrow, kind	none	Feature card (with author) + 4 cards
Home: Related to Agentic AI (List)	D. Tag-based (query index)	pages under /en/dummy-pages	tcs-corp:topic/agentic-ai, any, newest first, max 8	8 cards in a horizontal rail
Home: Intelligence in Action (List)	C. Parent page	children of …/dummy-pages/case-studies	title A–Z, max 3	3 case studies, 1:1 images
Home: news (List)	C. Parent page	children of …/dummy-pages/newsroom	title A–Z, max 3, rows of links	3 news rows
Dummy hubs: Industries, Newsroom, Case studies, Insights, Careers (List)	C. Parent page (current page)	the hub's children	title A–Z	4 / 3 / 3 / 19 / 2 cards
Dummy pages: Related insights / news (List)	D. Tag-based	pages under /en/dummy-pages	the page's topic, industry and service tags, any, newest first, max 3	1–3 cards per page
Explore insights (Filter List)	E. Query index	all pages under /en/dummy-pages	pills: Agentic AI, Generative AI, Customer Experience, Personalisation, Cloud, Data (multi-select); advanced: Industry, Service, Technology, Content type (OR)	39 results; pills narrow (Agentic AI: 8); advanced Banking: 6, Banking or Oracle: 7; empty state with Reset

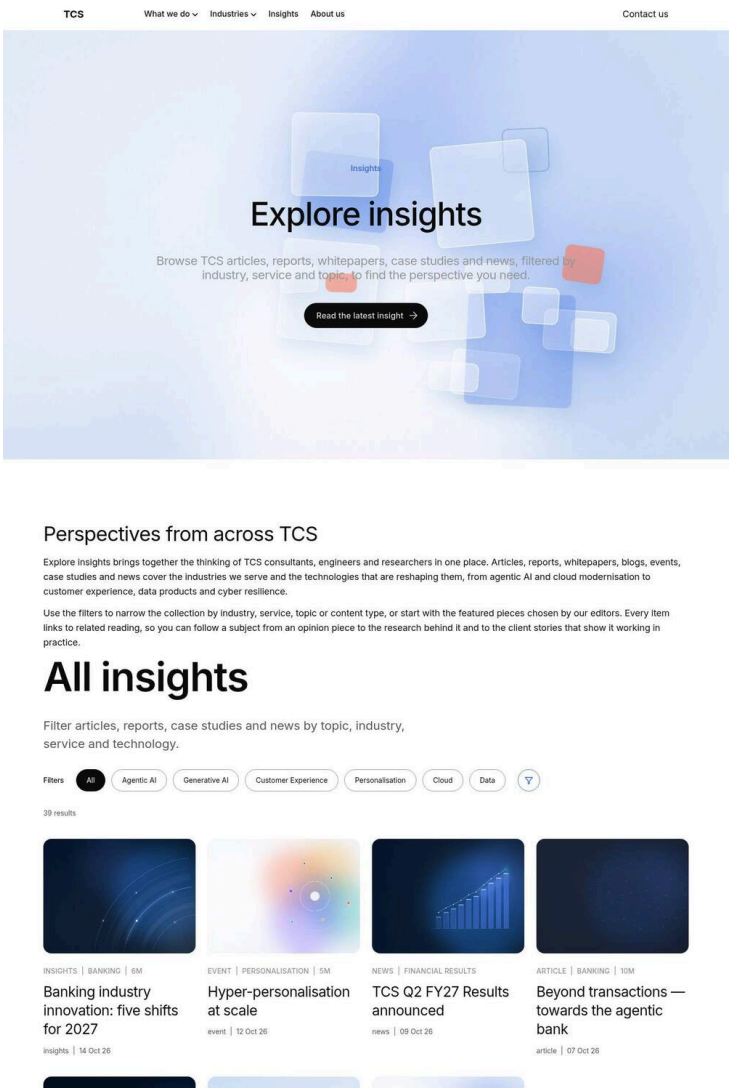

Figure 5: Explore insights: the Filter List over the dummy pages (pills, advanced filter, result count, cards)

Tags from AEM (F-07, fixed in code). AEM publishes the page Tags (`cq:tags`) as one comma-separated `<meta name="cq-tags">` (aem.live, Component Model Definitions), while the code and the index read `article:tag`. The index now has a `cqTags` column and `utils/query-index.js` merges it into each page's tags; `getPageTags()` reads `cq-tags` too. Without this change the tag-based Lists and the Filter List would stay empty for authored pages.

Section G – QA Results

Passed checks

#	Check	Result
1	All links work	Every internal link of the Home page and the 40 dummy pages resolves to a page of the set (0 broken)
2	All CTAs work	Hero, list headers, Table List items and view-all button, canvas pills, Teaser CTAs and dummy page hero CTAs lead to existing pages
3	All images load	0 broken images on 41 pages; 45 DAM assets referenced by valid paths
4	DAM references valid	Every image field and page image points to an asset of the package
5	Tags resolve	All tag IDs exist in the package taxonomy; labels from the taxonomy sheet on cards and pills
6	No broken references	Package: 188 well-formed XML files; every component name, model field and option value validated against the component models (0 warnings)
7	Mandatory fields	Titles, links, images and CTA texts set on every component; no empty sections; no placeholder text
8	Dynamic retrieval	Manual, fixed, parent, tag-based and query-index retrieval return the expected pages (section F)
9	Components render	All 9 Home components and every dummy page block decorate (status loaded)
10	Responsive	1440 px and 402 px: no horizontal overflow; rails scroll, CTAs stack, teaser and canvas reflow
11	Metadata populated	Page properties on all 41 pages; 41 metadata sheet rows; Authors row
12	No empty sections	Every section has content; Related Lists are omitted on pages without tags

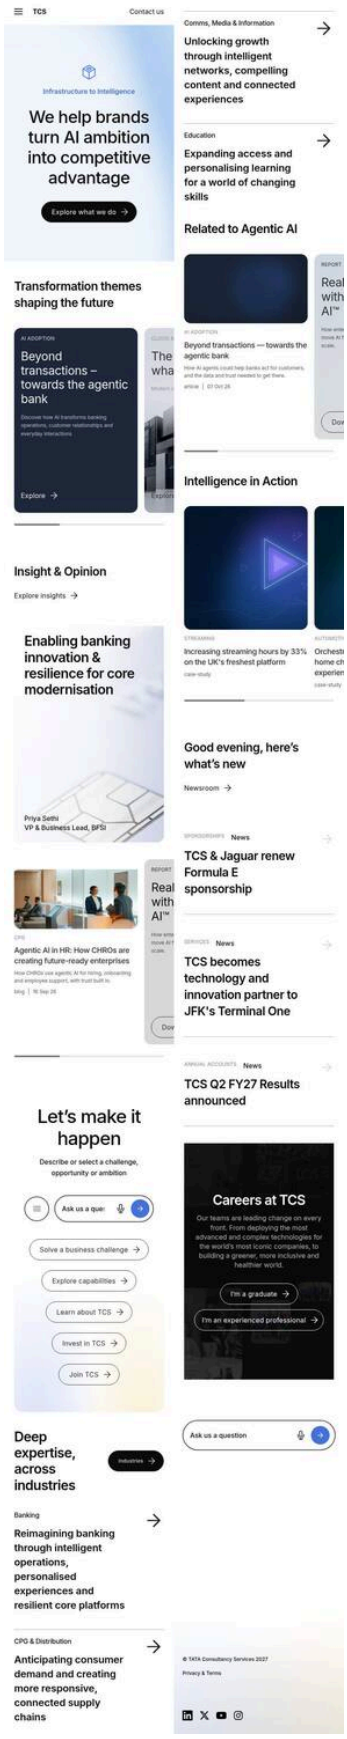

Figure 6: Home page at 402 px

Failed checks and limitations

- **Not created in AEM by this session**: no author access (401). The package must be installed and published (steps above); validation was done on a local preview that serves the same markup AEM delivers, with the index, taxonomy and Authors sheet as they will be published.
- **Template copied by structure**: the template's JCR couldn't be read, so its sections, blocks and block settings (from its preview) were reproduced, not its nodes. Its empty placeholder blocks are replaced by authored ones.
- **Card metadata depends on the metadata sheet**: content types, reading time, authors and the featured flag of retrieved cards come from `metadata.csv`; until `metadata.source` is configured (F-11) retrieved cards show title, description, image, date and tags only. The sheet has no `eyebrow` column, so retrieved cards have no eyebrow (the Home fixed lists set theirs on the items); add an `eyebrow` column to the sheet to show them.
- **Image columns of the sheet stay empty** (og-image, twitter-image, thumbnail-image, featured-image): a DAM path in a sheet is not rewritten to a delivered image URL. Pages keep their own image (og:image is the first image of the page), the List uses it, and the Filter List falls back to it (Mapping › Fallback image = image).
- **Composite multifields** (Hero CTAs, Filter List pills and categories) are stored as `item0…` child nodes, the Universal Editor convention; open the Hero once in Universal Editor after install to confirm the CTA list shows.
- **Assets** need *Reprocess Assets* after install (renditions, Dynamic Media).
- **Figma deviations**: client brand imagery and client names in eyebrows (a bank logo, a streaming app, a telecom assistant) are replaced with neutral images and industry / topic eyebrows; typos corrected ("baking" → banking, "cnnected" → connected, "COUD" → Cloud, "whats" → what's); the image-theme cards show a short summary and "Explore" (the List always shows a description and the CTA); "Good evening" is static text; the floating "Ask us…" bar and the logo row are the global footer canvas and header.

Findings during the implementation

ID	Finding	Status
F-07	Page tags authored in AEM (`cq-tags`) were not read by the index, Lists and Filter List	Fixed in code (this change); index re-indexing required
F-61 (new)	A Hero whose content starts with the icon lost its title and eyebrow: `aem.js` wraps such a cell in one paragraph, and the Hero read everything as description (also visible in the handover screenshot `hero-text-right.jpg`)	Fixed in `blocks/hero/hero.js`
F-62 (new)	In the List, "use current page" of the Tags source sets the search root, not the page's tags (AEM Core List semantics); related-content lists must list their tags	Documented; dummy pages author their tags
F-63 (new)	Multi-select Filter List pills match pages with every selected tag (AND); Filter logic applies to the advanced options only	Documented (designed behaviour)

Potential improvements

- Configure `metadata.source` for the 13 locale sheets so card eyebrows, content types and authors apply everywhere (F-11).
- Replace the generated imagery with approved photography in the same DAM paths (references stay valid).

- Add a personalised greeting ("Good morning / evening") in the List header via a small decorator, if wanted.
- Add the Figma typography for the Hero eyebrow (dark instead of brand blue) and the theme cards (CTA hidden on image cards) as List / Hero options.
- Update the handover document (Part 16: F-07 fixed, F-61–F-63) and regenerate its PDF with the next release.
