2. Adding and configuring blocks

Where components can be added

What the **Add (+)** picker offers is defined by the filters in component-filters.json (aggregated from models/_component-filters.json, models/_section.json and each block's _<block>.json):

Container	Allowed components
Main (the page)	Section, Gen Carousel, Tabs Container, Columns Container
Section	Text, Image, Button (Button Block), Title, Page Header, Hero, Teaser, Quote, Testimonial, Anchor List, Accordion, Tabs (block), Table, Table List, List, Separator, Embed, Video, Modal, Form Variations, Filter List, Conversation Canvas, Cards, Fragment, Footer, TCS Header
Columns Container	Column Break, then the Section's components except Page Header, Footer and TCS Header
Tabs Container	Tab, Column Break, then the Section's components except Page Header, Conversation Canvas, Footer and TCS Header
Gen Carousel	Hero, Teaser

The item filters of each block (Accordion Item, Card, List Item, CTA, Link, Stat, form fields, Table rows, ...) are listed in blocks/README.md. Not offered in any filter: the built-in Columns (compatibility only), the built-in Button ("Button (basic)"), and Interactive Dashboard (placeholder) (blocks/README.md).

Block reference

Each block README holds the dialog fields per tab (generated from the models), the variations, authoring steps, accessibility, data layer and troubleshooting. Don't repeat fields elsewhere; read them there.

Block	README	Added in	Status
Accordion	accordion	Section, Columns Container, Tabs Container	Active
Anchor List	anchor-list	Section, Columns Container, Tabs Container	Active
Button (Button Block)	button-block	Section, Columns Container, Tabs Container	Active
Cards	cards	Section, Columns Container, Tabs Container	Active
Column Break	column-break	Columns Container, Tabs Container	Active
Columns (built-in)	columns	None (no longer offered)	Compatibility-only
Columns Container	columns-container	Main (page)	Active
Conversation Canvas	conversation-canvas	Section, Columns Container	Active
Embed	embed	Section, Columns Container, Tabs Container	Active
Filter List	filter-list	Section, Columns Container, Tabs Container	Active
Footer	footer	Section (on the footer reference page)	Active
Form Variations	form-variations	Section, Columns Container, Tabs Container	Active
Fragment	fragment	Section, Columns Container, Tabs Container	Active
Gen Carousel	gen-carousel	Main (page)	Active
Header	header	Not a component: built from the nav page	Active
Hero	hero	Section, Columns Container, Tabs Container, Gen Carousel	Active
Interactive Dashboard	interactive-dashboard	None	Experimental
List	list	Section, Columns Container, Tabs Container	Active

Block	README	Added in	Status
Modal	modal	Section, Columns Container, Tabs Container	Active
Page Header	page-header	Section	Active
Quote	quote	Section, Columns Container, Tabs Container	Active
Separator	separator	Section, Columns Container, Tabs Container	Active
Tab	tab	Tabs Container	Active
Table	table	Section, Columns Container, Tabs Container	Active
Table List	table-list	Section, Columns Container, Tabs Container	Active
Tabs Container and Tabs (block)	tabs	Main (container); Section, Columns Container, Tabs Container (block)	Active

Teaser	teaser	Section, Columns Container, Tabs Container, Gen Carousel	Active
Testimonial	testimonial	Section, Columns Container, Tabs Container	Active
Video	video	Section, Columns Container, Tabs Container	Active

Default content (Text, Title, Image) uses AEM's built-in components (handover Part 6, chapters 6.6 to 6.8).

The Additional tab

Every block model except the header and footer ends with an **Additional** tab (rules in AGENTS.md, "Additional tab" and "Animation and skeletons"):

Field	Name	Effect
Anchor ID	`classes_anchor`	Must match `anchor-…` (lower case, digits, hyphens); becomes the block's `id` (decorators/block-options-decorator.js), de-duplicated as `-2`, `-3`; also the block's data layer id
Hide block	`classes_hideblock`	Hidden on the site and in Preview; faded in edit mode; the content stays in the delivered HTML (not an embargo mechanism)
Padding / Margin Left, Right, Top, Bottom	`classes_padding*`, `classes_margin*`	`--space-*` tokens, the same at every breakpoint
Animation Type, Motion Speed, Animation Trigger	`classes_animation*`	Content animation on 19 blocks; never in edit mode or for reduced motion (docs/animation/README.md)
Background animation	`classes_bganimation`	Hero, Teaser, Quote, Testimonial, Form Variations, Conversation Canvas

Container sections (Columns Container, Tabs Container, Gen Carousel) carry the same options as `container*` fields (`containerAnchor`, `containerHide`, …), applied by `applySectionBlockOptions` in scripts/scripts.js.
