## 1. Gherkin acceptance criteria

```
Feature: Gen Carousel

Scenario: An author adds the Gen Carousel and fills in its required fields
  Given an author in Universal Editor on a test page
  When preview
  Then the block appears with the authored content; no empty placeholder remains

Scenario: Gen Carousel with optional fields left empty
  Given a published page with the block
  When preview
  Then the block renders without empty wrappers or broken layout

Scenario: Gen Carousel with invalid content (very long text, missing image, broken link)
  Given a published page with the block
  When preview
  Then text wraps, no broken image icon, the link is flagged in the link check
```
